

Noah Zhong

Melbourne, VIC | 0402 386 948 | NoahZhong.Au@gmail.com

PROFESSIONAL SUMMARY

Monash Computer Science student with hands-on experience building and supporting AI products. Experience includes PyTorch model training, full-stack features, LLM agent workflows, MCP integrations and day-to-day support for an AI agent Harness used by manufacturing teams. Comfortable debugging models, frontend, backend, APIs and deployments, and working with users to turn real workflows into reliable software.

TECHNICAL SKILLS

Programming: Python, TypeScript, JavaScript, Java and SQL

Deep Learning & Data: PyTorch, NumPy, pandas, scikit-learn, Jupyter, neural networks, CNNs, model training and evaluation

AI & Agents: LLM APIs, MCP servers, agent tools, prompt and workflow design, agent knowledge files and context management

Web & Backend: React, Node.js, REST APIs, PostgreSQL, authentication and role-based access control

DevOps & Support: Docker, Git/GitHub, debugging, logs, testing, deployment and production support

Testing & Documentation: Bug reproduction, log analysis, API checks, production verification and technical specifications

TECHNICAL EXPERIENCE

AI Deployment Engineer Intern

Jul 2026 - Present

AIDC - AI Deployment Company | Melbourne / Shenzhen / Remote | www.ai-dc.ai/company

- Operate and maintain AIDC's Company Harness, a file-based system that gives each AI agent its role, knowledge, permissions, SOPs and tools.
- Debug issues across the Harness, LLM calls, MCP tool connections, APIs and deployment environment by reading logs, reproducing failures, testing fixes and checking production behaviour.
- Configure and maintain role-based AI agents for manufacturing and supply-chain teams, including knowledge files, tool permissions, prompts and workflow settings.
- Work with users and the engineering team to turn quotation, production-planning and operations tasks into clear agent workflows, then document issues and release fixes.
- Make small frontend and backend changes with TypeScript, JavaScript, React, Node.js and Python, and use Git and Docker for testing and deployment.

Full-Stack & AI Engineer (Contract)

Mar 2026 - Jul 2026

Airbotix | Melbourne / Remote | airbotix.ai

- Built and maintained features for Airbotix, an AI education platform that connects student, teacher and administration workflows across several web apps.
- Integrated LLM features and MCP-based tools into product workflows, connecting React interfaces to Node.js and TypeScript APIs and data services.
- Built REST APIs, data models, authentication and role-based access flows, and frontend integrations with React, TypeScript, Node.js and PostgreSQL.
- Delivered teacher-console tools for student search, class and enrolment filters, privacy rules and API integration.
- Worked in a six-person product team, using technical specs and GitHub pull requests to coordinate changes, debug local and Docker services, and resolve API integration issues.

AI Intern - Smart City Transport & Logistics Project

Jul 2024 - Aug 2024

Shenzhen Big Data Research Institute, CUHK-Shenzhen | Shenzhen, China

- Worked on a smart-city transport and logistics research project at CUHK-Shenzhen, reviewed related research, wrote technical summaries and reports, and represented the institute at WOLIT 2024.
- Built and trained neural networks and simple CNNs in PyTorch for the project using tensors, Dataset and DataLoader pipelines, forward passes, cross-entropy loss, backpropagation and gradient-based optimizers.
- Wrote training and validation loops in Jupyter, tracked loss and accuracy, and tested changes to network layers, batch size and learning rate.
- Prepared the project data with NumPy and pandas, built an SVM baseline with scikit-learn, and evaluated classification results with balanced accuracy and confusion matrices.

ADDITIONAL EXPERIENCE

Private Tutor, Debate Coach & Study Abroad Consultant

Feb 2024 - Dec 2025

Suzhou Xuanzhou Education Technology Co., Ltd. / Suzhou Qianwei Education Consulting Co., Ltd. | Suzhou / Remote

- Tutored AP, A-Level and IB Computer Science in English, adjusting explanations and exercises for each course and student level.
- Taught IELTS Listening, Reading, Writing and Speaking, with direct feedback on language, structure and exam technique.
- Coached English parliamentary debate, including argument building, rebuttal, speech structure and public speaking.
- Advised students and families on programme choices, academic planning, applications and English preparation.

Construction Labourer (Part-time) / Acting Leading Hand

Nov 2025 - Dec 2025

Niu Builder Group | Melbourne, VIC

- Coordinated daily labour tasks, kept the work area safe and organised, and helped the team stay on schedule.

Operations & Marketing Lead (Co-founder)

Aug 2023 - Aug 2024

Suzhou Chengtian Information Service Co., Ltd. | Suzhou, China

- Co-founded a campus delivery service, helped operate its WeChat Mini Program, managed partnerships and tested an early trading-algorithm prototype in Python.

EDUCATION

Bachelor of Computer Science (Data Science & AI)

Feb 2025 - Present

Monash University | Melbourne, Australia

- WAM: 79
- Outreach Officer - Melbourne Venture Club: organised events, contacted sponsors and external partners, and helped run the Next-Gen Entrepreneurship Competition.

Bachelor of Information Management & Information Systems (Transferred)

Sep 2022 - Dec 2024

Xi'an Jiaotong-Liverpool University | Suzhou, China

- Awarded a Top 25% scholarship; coursework included data structures, AI and algorithms, SQL, Java, statistics and software engineering.
- Founding Member - Suzhou Union, XJTLU English Debate Organisation: helped set up the society, ran events, managed its WordPress site and handled WeChat and bilingual content.
- Competed in NEAUDC and other English parliamentary debate tournaments and received several Outstanding Speaker results.
- Operations Intern - XJTLU Museum (Jul 2023 - Sep 2023): supported exhibitions and TEDxXJTLU speakers, gave bilingual tours and wrote WeChat and event content.

LANGUAGES

English (near-native proficiency) | Mandarin Chinese (native)
